

## Declaration of Conformity

As the managing director of DynaGo Ltd. and as the leader of the ERMICO Ltd's implementation project I declare that the installed Microsoft Business Central ERP system covers the whole range of requested processes by the company. We have tailored the system to the requirements of ERMICO Ltd. The complying with current Hungarian laws is provided by the official domestic partner of the manufacturer, Microsoft Corporation.

During the deployment of the system, we have taken into account that Ermico Ltd. would be able to adapt quickly and flexibly to customers' demands and requests and serve their customers at the best possible price. Because of this aim all required steps of the sales process have been integrated: customer price requests, vendor price request, outbound quotations, order handling and confirmation, delivery and fulfilment confirmation, invoicing. The management information system ensures that both customer and vendor information is presented flexible, quantifiable manner, thereby supporting fast decision making.

Thanks to the expandable and parameterizable design of the system, it is able to keep track of the changes that come from the company's growth and development.

Budapest, 1st of September 2021.
